Relations of areas on divided line segments.

14 propositions.

Definitions	19
Propositions	19

Book III

Circles.

37 propositions.

Definitions	25
Propositions	26

Book IV

Construction of figures inscribed in and circumscribing circles.

16 propositions.

Definitions	41
Propositions	42

Table of Contents

Book V

Ratios and proportions of magnitudes.

25 propositions.

Definitions	47
Propositions	50

Book VI

Ratios and proportions of plane figures.

33 propositions.

Definitions	61
Propositions	61

Book VII

Numbers: primes and factors.

39 propositions.

Definitions	75
Propositions	77

Book VIII

Numbers: ratios and proportions.

27 propositions.

Propositions	89
------------------------	----

Book IX

Numbers: plane and solid, even and odd.

36 propositions.

Propositions	101
------------------------	-----

Book X

Commensurable and incommensurable magnitudes and their relations.

115 propositions.

Definitions I	113
Propositions	114
Definitions II	132
Definitions III	146

Book XI

Solid figures.

39 propositions.

Definitions 161

Propositions 164

Book XII

Ratios and proportions of circles and solid figures.

18 propositions.

Propositions 183

Book XIII

The five regular solids and their construction.

18 propositions.

Propositions 193
