

## Table of Contents

The Green Lion's Preface . . . . .	xi
Editor's Note . . . . .	xii
Author's Preface to the Green Lion Edition . . . . .	xiii
Author's Preface (1968) . . . . .	xvii

### PART ONE

#### The account of Faraday's Theory in the *Treatise*

Chapter 1. Faraday's Thought on Electromagnetism . . . . .	3
The nature of science for Faraday . . . . .	4
Faraday's ultimate views on electromagnetism . . . . .	19
Chapter 2. The Translation of Faraday's Ideas before Maxwell . . . . .	39
The "translation" of Faraday . . . . .	39
The interpretation of "lines of force" . . . . .	50
Magnetism and diamagnetism . . . . .	79
Interpretations of Faraday's electrostatics . . . . .	62
Thomson's analytic translations of Faraday's ideas . . . . .	89
Chapter 3. Maxwell's Initial Statement of Faraday's Electromagnetism . . . . .	111
The "direct" and "indirect" methods . . . . .	111
The theory of magnetic shells . . . . .	114
Commentary on Chapter I of Part iv of the <i>Treatise</i> . . . . .	118
Ampère's theory in the <i>Treatise</i> . . . . .	141
Electromagnetic rotations . . . . .	162
Commentary on Chapter III of Part iv of the <i>Treatise</i> . . . . .	175

### PART TWO

#### Maxwell's Dynamical Theory of Electromagnetism

Chapter 4. Maxwell's Exposition of the Lagrangian Equations . . . . .	201
Lagrangian theory in the <i>Treatise</i> . . . . .	201
Thomson and Tait's derivation of Lagrange's equations . . . . .	207
Maxwell's exposition of Lagrangian theory . . . . .	213

Chapter 5. The Meaning of “Dynamical Theory” for Maxwell . . . . .	227
Physics . . . . .	227
Metaphysics . . . . .	241
The meaning of dynamical terms . . . . .	265
Chapter 6. Application of Dynamical Theory to Electromagnetism . .	271
The construction of the electromagnetic field . . . . .	289
Completion of the dynamical theory . . . . .	300
Résumé of the dynamical theory . . . . .	312
Conclusion . . . . .	319
Bibliography . . . . .	323
Index . . . . .	343
About the Author . . . . .	351
